PREFACE

This bibliography has been compiled for the use of National Forests in the Southwestern Region as well as interest scholars. It is the third effort in as many years and contains primarily those report received in the Regional Office dated during 1978. The editorial conventions of the first bibliography have been followed with the addition of the Forest Service report number. This number is listed as 78-010, for example, and indicates that the report was generated in 1978 and is report number 10 in the Forest Service file for that Forest during 1978.

Again we urge any oversights be reported so that we can include such entries in next years bibliography. I am especially appreciative of the work of Polly Davis in compiling this report.
