Issues Series

Forest Pharmacy: Medicinal Plants in American Forests, Steven Foster, \$6.95

American Forests: A History of Resiliency and Recovery, Douglas W. MacCleery, \$6.95
Supply and American Demand, Thomas R. Roach, \$6.95

Newsprint: Canadian Supply and American Demand, Thomas R. Roach, \$6.95

America's Fires: Management on Wildlands and Forests, Stephen J. Pyne, \$6.95

Oral Histories and Other Publications

From Sagebrush to Sage: The Making of a Natural Resource Economist, Marion Clawson, \$9.95

Plantation Forestry in the Amazon: The Jari Experience, Clayton E. Posey, Robert J. Gilvary, John C. Welker, L. N. Thompson, \$12.95

Cradle of Forestry in America: The Biltmore Forest School, 1898–1913, Carl Alwin Schenck, \$9.95

Evolution of Tropical Forestry: Puerto Rico and Beyond, Frank H. Wadsworth, \$5.50 postage and handling

Forest Service Research: Finding Answers to Conservation's Questions, Harold K. Steen, \$10.95

View From The Top: Forest Service Research, R. Keith Arnold, M. B. Dickerman, Robert E. Buckman, \$13.00

Forest Service Research, Carl E. Ostrom, \$18.00

EPA during the Bush Administration, William K. Reilly, \$18.00

CEQ and EPA under Nixon and Ford, Russell E. Train, \$19.00

Archival Collections of the Forest History Society: An Annotated Guide, Michele A. Justice, \$13.00

Oral History Collection of the Forest History Society: An Annotated Guide, Barbara D. Holman and Michele A. Justice, \$18.00

FROM DUKE UNIVERSITY PRESS
BOX 90660, DURHAM, NC 27708-0660
919/687-3600

Changing Pacific Forests: Historical Perspectives on the Forest Economy of the Pacific Basin, John Dargavel and Richard Tucker, cloth \$39.95; paper \$14.95

Forest History Museums of the World, Kathryn A. Fahl, \$12.00

North American Forest and Conservation History: A Bibliography, Ronald J. Fahl, \$31.95

First National Colloquium on the History of the Forest Products Industries, Elwood R. Maunder and Margaret G. Davidson, Proceedings, Boston, Massachusetts, May 17–18, 1966, \$16.00

David T. Mason: Forestry Advocate, Elmo Richardson, \$8.00

Bernhard Eduard Fernow: A Story of North American Forestry, Andrew Denny Rodgers III, \$21.95

Sustained-Yield Forestry, Harold K. Steen, \$21.95

Origins of the National Forests: A Centennial Symposium, Harold K. Steen, cloth \$31.95; paper \$16.95

Changing Tropical Forests: Historical Perspectives on Today's Challenges in Central and South America, Harold K. Steen and Richard P. Tucker, cloth \$31.95; paper \$16.95

FROM UNIVERSITY OF GEORGIA PRESS
330 RESEARCH DRIVE, ATHENS, GA 30602-4901
800/266-5842

Crusading for Chemistry: The Professional Career of Charles Holmes Herty, Germaine M. Reed, \$36.00

FROM UNIVERSITY OF WASHINGTON PRESS
P.O. BOX 50096, SEATTLE, WA 98145-5096
800/441-4115

The Forested Land: A History of Lumbering in Western Washington, Robert E. Ficken, \$25.00

George S. Long, Timber Statesman, Charles E. Twining, \$30.00

Phil Weyerhaeuser: Lumberman, Charles E. Twining, \$25.00

Timber on the Move: A History of Log-Moving Technology, Vester Dick (1981).

Up in Flames: A History of Fire Fighting in the Forest, Vester Dick (1984).

Forest History Society Issues Series

The Issues Series published by the Forest History Society are booklets that bring a historical context to today's most pressing issues in forestry and natural resource management. FHS invites authors of demonstrated knowledge to examine an issue and synthesize its substantive literature. The Issues Series—like its Forest History Society sponsor—is non-advocacy. The series aims to present a balanced rendition of often contentious issues. They are attractive, informative, and easily accessible to the general reader.

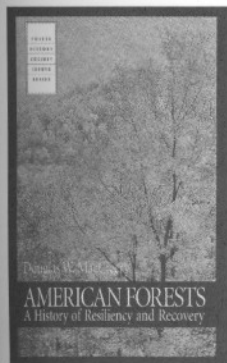

AMERICAN FORESTS:

A History of Resiliency and Recovery

by Douglas W. MacCleery

Many of today's forestry debates hinge on "how much there is" and "how much there was." *American Forests* documents the changes our nation's forests have experienced from colonial times to the present. It presents a baseline for discussion. Included in this 58-page text are the extent of U.S. forests prior to European settlement; native American peoples' effects on the forest; population and

agricultural expansion; uses of the forest for fuel, ironmaking, transportation, and expanded lumber production; and early conservation efforts. It contains 13 photographs and 18 figures and graphs. Four-color cover.

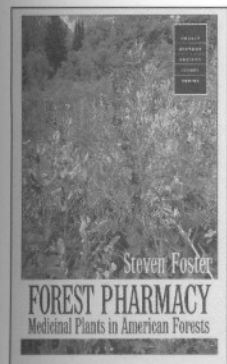

FOREST PHARMACY

Medicinal Plants in American Forests

by Steven Foster

The identification of taxol as a potential cancer fighting compound highlighted American interest in plant-derived medicines. The bark of the Pacific yew, a relatively neglected though not rare tree, is the source for taxol. Once scientists discovered taxol's effect, the need for a sustainable supply of the raw material became clear. The balance between resource

extraction and human benefit took center stage. This booklet identifies 120 trees, herbaceous plants and shrubs listed for their medicinal values. Another 14 plants are discussed in detail including ginseng, goldenseal, passionflower, mayapple, bloodroot, and others. Contains 17 photographs and 4 tables. Four-color cover.

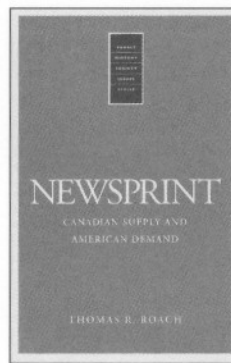

NEWSPRINT

Canadian Supply and American Demand

by Thomas R. Roach

Newsprint documents the growth of the Canadian newsprint industry and its traditional reliance on U.S. markets. In more recent years, significant market shifts, a strong Canadian dollar, and environmental concerns have brought newsprint's future into question. The author discusses export restrictions and tariffs; government intervention, the changing structure of Canadian forests; international competitiveness and new approaches to

fiber production. The 56-page volume includes 19 color figures and 7 tables. Four-color cover.

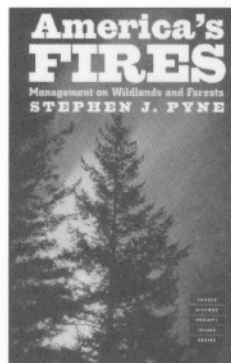

AMERICA'S FIRES

Management on Wildlands and Forests

by Stephen J. Pyne

Fire is at the heart of many forest health and sustainability issues being discussed today. Written by the authoritative expert on the subject, this booklet documents the extraordinarily successful twentieth century campaign to prevent and suppress wildland and forest fires. Ironically, this fire exclusion has altered ecosystems in ways that increase forest susceptibility to fires

and also to insect attacks. Healthy forests in America require fire. At the same time urban expansion into wildland areas has caused logistical nightmares in fighting wild fires. The result, in some cases, has been saving individual homes while fires rage on to destroy valuable timber and recreational resources. Contains 18 photographs and 21 maps and figures. Four-color cover.
