

Unit Structures Merge With Koppers Wood Preserving Division

Merger of Unit Structures, Inc., into the Wood Preserving Division of Koppers Company, Inc. was announced jointly by Max C. Hanisch, president of Unit Structures, and Douglas Grymes, vice president and general manager of Koppers Wood Preserving Division.

Unit Structures, with headquarters and a plant at Peshtigo, Wis., and plants in Magnolia, Ark., and Morrisville, N. C., is a leading producer of glue-laminated products including straight structural beams, structural arches, roof decks, laminated trusses and specialty laminated products.

Koppers Company, Inc. is a multi-division company, with headquarters in Pittsburgh, Pa. In addition to its worldwide engineering and construction activities, Koppers is a producer of chemicals, plastics, building materials, timber and metal products. Its Wood Preserving Division operates 31 wood preserving plants throughout the United States.

Mr. Hanisch has been appointed a vice president of Koppers Company, Inc. and will continue to manage the operations of Unit Structures.
